1). Largest of 3 number using conditional Statement.

```
Public class LargestNumber {
    Public Static void main (String [] args) {
        int a = 10;
        int b = 30;
        int c = 5;
        if ( a > b && a > c) {
            System.out.println ("Largest number is : " +a);
        }
        else if ( b > a && b > c) {
            System.out.println (" Largest number is : " + b);
        }
        else {
            System.out.println (" Largest number is : " +c);
        }
    }
}.
```

o/p:

Largest number is : 30.

② . Designation based on Salary using switch Statement

```
public class Designation {
    public static void main (String [] args) {
        int salary = 20000;
        switch ( salary ) {
            case 10000 :
                System.out.println (" Engineer ");
                break;
            case 20000 :
                System.out.println (" Lead ");
                break;
            case 30000 :
                System.out.println (" manager ");
                break;
            default :
                System.out.println (" not matching ");
        }
    }
}
```

o/p

Lead.
