Day-08 Assignment

1. Handle the table in

<https://demoqa.com/webtables> and display the output:

The screenshot shows the Eclipse IDE with a Java project named 'Selenprogram'. The 'Project Explorer' on the left shows the project structure, including 'src/test/java/ActionPackage/HandleEle.java'. The 'HandleEle.java' file is open in the editor, showing a Selenium WebDriver script that navigates to 'https://demoqa.com/webtables', finds a table, and prints its contents. The 'Console' at the bottom displays the output of the program, showing a warning about Selenium version and the table data.

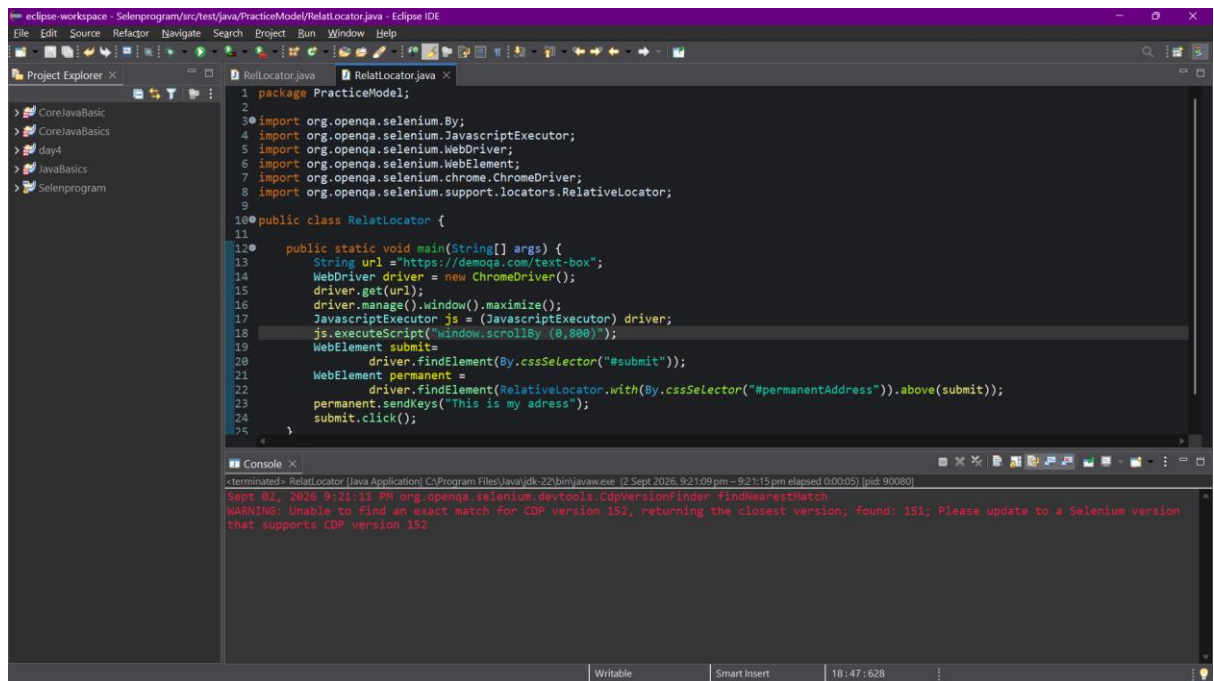

```
1 package ActionPackage;
2 import java.util.List;
3 import org.openqa.selenium.By;
4 import org.openqa.selenium.WebDriver;
5 import org.openqa.selenium.WebElement;
6 import org.openqa.selenium.chrome.ChromeDriver;
